

COVID-19 confirmed cases*

Data up to 5th August

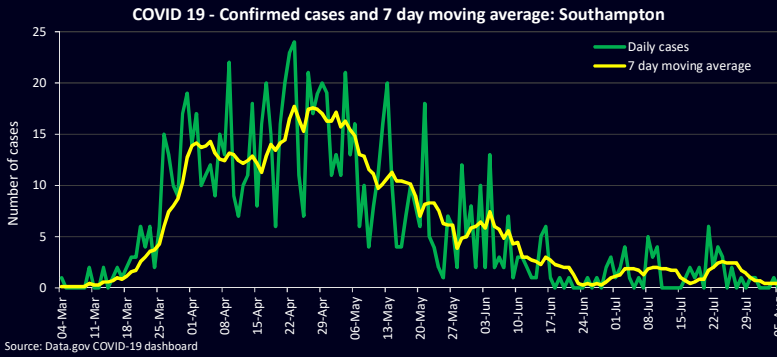

Total cases **
964

Cases in last 7 days **
3

Change in last 7 days
-7

Average cases per day (last 7 days)
0.4

There have been **964 confirmed cases** of COVID-19 in Southampton (includes both pillar 1 and 2 cases). There were **3 confirmed cases** in the **last 7 days**, which is a **decrease of -7** compared to the **previous 7 days**.

Data is correct at time of publication, but is subject to change due to reporting delays and corrections. Therefore, any changes in the number of infections should be **interpreted alongside overall trends**, as there will be daily fluctuations. It is more important to consider any **sustained increases** that may occur.

The chart to the left shows the **daily number of confirmed cases** and the **7 day moving average** (to smooth out fluctuations) in Southampton. The number of **new cases peaked** in Southampton in **April** and has experienced a **sustained decline** since.

* Cases include both pillar 1 and 2

** Correct at time of publication, but may be revised in future weeks due to reporting delays

COVID-19 confirmed cases per 100,000 population*

Data up to 26th July

Total cases per 100k population **
379.0

Cases per 100k population in current week ** (week 30)
5.54

Cases per 100k population in previous week ** (week 29)
2.37

Direction of travel to previous week
Increase

Southampton has a total of **379.0 cases per 100,000 population**. Please note, data for week 31 was not available at time of publication, so this indicator has not been updated this week.

Public Health England publish weekly the number of cases per 100,000 population in their COVID-19 Surveillance reports. The trend in the weekly number of cases per 100,000 population is shown in the chart to the left. In the most recent week (**week 30**) there were **5.54 cases per 100,000 population**, which is an **increase** compared to the **previous week (2.37 cases per 100,000 population in week 29)**. Overall, the number of **infections remain low**.

Numbers of cases vary by week and day (see case numbers above). **Case numbers are also subject to revisions**, especially most recent data. It should be noted that low case numbers can impact on the **reliability of estimates**.

* Cases include both pillar 1 and 2

** Correct at time of publication, but subject to revision in subsequent weeks due to reporting delays

Deaths

Change from previous week
+1

There have been a total of **166 COVID-19 related resident deaths** in Southampton. Of those, **101 died in hospital** and **65 in the community** (**52 of which were in care homes**). There was **1 COVID-19 related death** in the most recent week, which is a change of **+1** compared to the **previous week**.

The chart to the left shows the number of **COVID-19 related deaths by week and setting**. The number of **COVID-19 related deaths peaked in mid-April** and have declined since.

In Southampton, resident **deaths** have now come down to **expected levels** compared to previous years.

Latest data shows that there were **no COVID-19 related deaths in University Hospital Southampton (UHS)** in the last week (30 July - 5 August). This data is different from that published by ONS as it doesn't necessarily include Southampton residents, only those who have died at UHS.
