

## COVID-19 confirmed cases\*

Data up to 2nd December

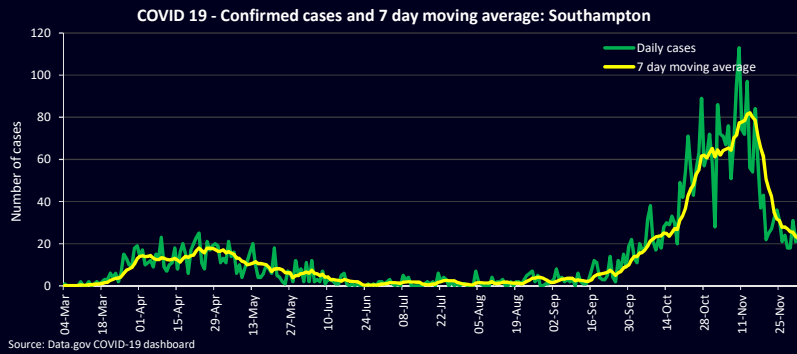

Total cases \*\*  
(Since 11th March 2020)  
**4,021**

Cases in last 7 days \*\*  
**158**

Change in last 7 days  
**-58**

Average cases per day (last 7 days)  
**22.6**

Source: Data.gov COVID-19 dashboard

There have been **4,021 confirmed cases** of COVID-19 in Southampton (includes both pillar 1 and 2 cases). There were **158 confirmed cases** in the **last 7 days**, which is a **decrease of -58** compared to the **previous 7 days**.

Data is correct at time of publication, but is subject to change due to reporting delays and corrections. Therefore, any changes in the number of infections should be **interpreted alongside overall trends**, as there will be daily fluctuations. It is more important to consider any **sustained increases** that may occur.

The chart to the left shows the **daily number of confirmed cases** and the **7 day moving average** (to smooth out fluctuations) in Southampton. Recent data suggests COVID-19 infections have been **decreasing** over the last two weeks in the city, following a sustained period of increase during the autumn months.

\* Cases include both pillar 1 and 2

\*\* Correct at time of publication, but may be revised in future weeks due to reporting delays

## COVID-19 confirmed cases per 100,000 population\*

Data up to 2nd December

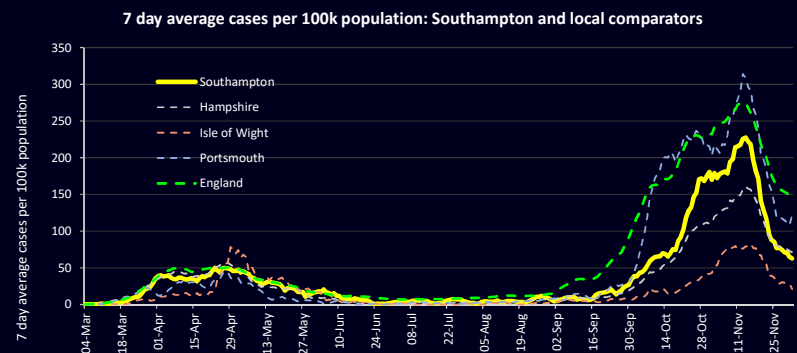

Total cases per 100k population \*\*  
**1,592.3**

7 day average cases per 100k population up to 2nd December\*\*  
**62.6**

7 day average cases per 100k population up to 25th November: \*\*  
**85.5**

Direction of travel to previous week  
**Decrease**

Source: Data.gov COVID-19 dashboard and ONS MYE 2019

Southampton has a total of **1,592.3 cases per 100,000 population**.

Weekly infection rates have been calculated using official data published by data.gov. This is calculated on a daily basis using infections data for the last 7 days and 2019 Mid Year Population Estimates. The trend in the 7 day rolling average number of cases per 100,000 population is shown in the chart to the left. In the most recent 7 day period up to **2nd December** there were **62.6 cases per 100,000 population**, which is a **decrease** compared to the **preceding 7 days (85.5 cases per 100,000 population in 7 day period up to 25th November)**. Similar to the latest England trend, rates in Southampton have been decreasing over the previous two weeks and also remains below England average (**148.7 cases per 100,000 population**).

**Numbers of cases vary by week and day** (see case numbers above). **Case numbers are also subject to revisions**, especially most recent data. It should be noted that low case numbers can impact on the **reliability of estimates**.

\* Cases include both pillar 1 and 2

\*\* Correct at time of publication, but subject to revision in subsequent weeks due to reporting delays

## COVID-19 related deaths

Deaths occurring up to 27th November

Total deaths  
**180**

Of which

Community  
**68**

In the last week  
**1**

Change from previous week  
**-1**

(54 of which in care homes)

Deaths

Source: Death registrations and occurrences by local authority up to week ending 27th November 2020, ONS

There have been a total of **180 COVID-19 related resident deaths** in Southampton. Of those, **112 died in hospital** and **68 in the community** (54 of which were in **care homes**). There was **1 COVID-19 related deaths** in the most recent week, which is **lower (-1)** when compared to the **previous week**.

The chart to the left shows the number of **COVID-19 related deaths by week and setting**. The number of **COVID-19 related deaths peaked in mid-April** and have declined since.

In Southampton, resident **deaths** are now at **lower levels** compared to previous years.

Latest data shows that there were **no COVID-19 related deaths in University Hospital Southampton (UHS)** between the 1st December up to 7th December. This data is different from that published by ONS as it doesn't necessarily include Southampton residents, only those who have died at UHS.

Please note: data correct at time of publication, but subject to revision in subsequent weeks due to reporting delays
