

COVID-19 confirmed cases*

Data up to 22nd July

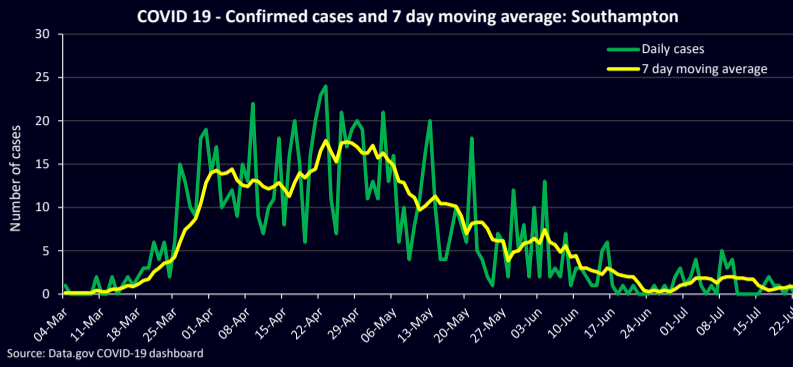

Total cases
944

Cases in last 7 days
6

Change in last 7 days
-1

Average cases per day (last 7 days)
0.9

There have been **944 confirmed cases** of COVID-19 in Southampton (includes both pillar 1 and 2 cases). There were **6 confirmed cases** in the last 7 days, which is a **decrease of -1** compared to the previous 7 days.

Any changes in the number of infections should be interpreted alongside overall trends, as there will be daily fluctuations. It is more important to consider any sustained increases that may occur.

The chart to the left shows the daily number of confirmed cases and the 7 day moving average (to smooth out fluctuations) in Southampton. The number of new cases peaked in Southampton in April and has experienced a sustained decline since.

COVID-19 confirmed cases per 100,000 population*

Data up to 19th July

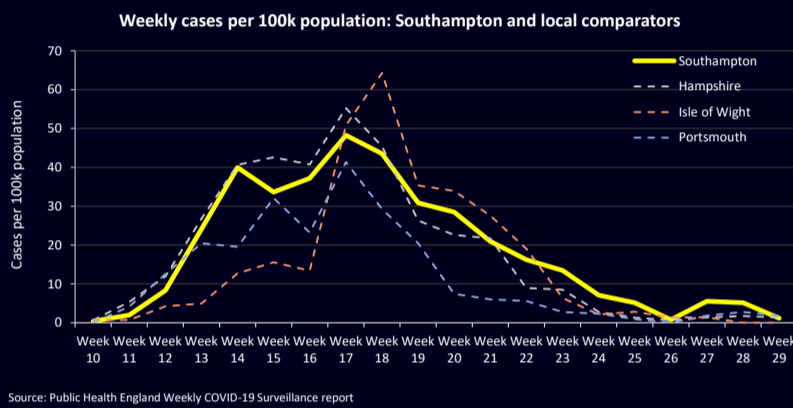

Total cases per 100k population
372.2

Cases per 100k population in current week (week 29)
1.19

Cases per 100k population in previous week (week 28)
5.14

Direction of travel to previous week
Decrease

Southampton has a total of **372.2** cases per **100,000 population**.

Public Health England publish weekly the number of cases per 100,000 population in their COVID-19 Surveillance reports. The trend in the weekly number of cases per 100,000 population is shown in the chart to the left. In the most recent week (week 29) there were **1.19 cases per 100,000 population**, which is a **decrease** compared to the the previous week (**5.14 cases per 100,000 population in week 28**). Overall, the number of infections remain low.

Numbers of cases vary by week and day (see case numbers above). Case numbers are also subject to revisions, especially most recent data. It should be noted that low case numbers can impact on the reliability of estimates.

Deaths

Change from previous week
0

There have been a total of **165 COVID-19 related resident deaths** in Southampton. Of those, **101 died in hospital** and **64 in the community** (51 of which were in care homes). There were **no COVID-19 related deaths** in the most recent week, which is **no change** compared to the previous week.

The chart to the left shows the number of COVID-19 related deaths by week and setting. The number of COVID-19 related deaths peaked in mid-April and have declined since.

In Southampton, resident deaths have now come down to **expected levels** compared to previous years.

Latest data shows that there were **no COVID-19 related deaths in University Hospital Southampton (UHS)** in the last week (16-22 July). This data is different from that published by ONS as it doesn't necessarily include Southampton residents, only those who have died at UHS.

Potential COVID-19 Pathways

Data up to 23rd July

999 calls
