

## COVID-19 confirmed cases\*

Data up to 18th November

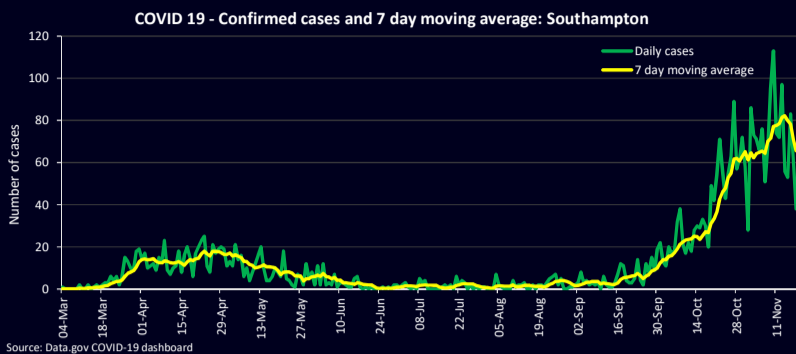

Total cases \*\*  
(Since 11th March 2020)  
**3,647**

Cases in last 7 days \*\*  
**459**

Change in last 7 days  
**-84**

Average cases per day (last 7 days)  
**65.6**

Source: Data.gov COVID-19 dashboard

There have been **3,647 confirmed cases** of COVID-19 in Southampton (includes both pillar 1 and 2 cases). There were **459 confirmed cases** in the **last 7 days**, which is a **decrease of -84** compared to the **previous 7 days**.

Data is correct at time of publication, but is subject to change due to reporting delays and corrections. Therefore, any changes in the number of infections should be **interpreted alongside overall trends**, as there will be daily fluctuations. It is more important to consider any **sustained increases** that may occur.

The chart to the left shows the **daily number of confirmed cases** and the **7 day moving average** (to smooth out fluctuations) in Southampton. Recent data suggests COVID-19 infections are starting to ease off slightly in the city, however we will need to monitor this over time to see if this downward trend is sustained.

\* Cases include both pillar 1 and 2

\*\* Correct at time of publication, but may be revised in future weeks due to reporting delays

## COVID-19 confirmed cases per 100,000 population\*

Data up to 18th November

Total cases per 100k population \*\*  
**1,444.2**

7 day average cases per 100k population up to 18th November: \*\*  
**181.8**

7 day average cases per 100k population up to 11th November: \*\*  
**215.0**

Direction of travel to previous week  
**Decrease**

Source: Data.gov COVID-19 dashboard and ONS MYE 2019

Southampton has a total of **1444.2 cases per 100,000 population**.

Weekly infection rates have been calculated using official data published by data.gov. This is calculated on a daily basis using infections data for the last 7 days and 2019 Mid Year Population Estimates. The trend in the 7 day rolling average number of cases per 100,000 population is shown in the chart to the left. In the most recent 7 day period up to **18th November** there were **181.80 cases per 100,000 population**, which is a **decrease** compared to the **preceding 7 days (215.0 cases per 100,000 population in 7 day period up to 11th November)**. Similar to the latest England trend, rates in Southampton have started to decrease over recent days and also remains below **England average (240.7 cases per 100,000 population)**. This will need to be carefully monitored to see if this change in the direction of travel is sustained.

Numbers of cases vary by week and day (see case numbers above). Case numbers are also **subject to revisions**, especially most recent data. It should be noted that low case numbers can

\* Cases include both pillar 1 and 2

\*\* Correct at time of publication, but subject to revision in subsequent weeks due to reporting delays

## COVID-19 related deaths

Deaths occurring up to 13th November

Total deaths  
**177**

Of which

Hospital  
**109**

Community  
**68**

In the last week  
**0**

Change from previous week  
**-2**

(54 of which in care homes)

Source: Death registrations and occurrences by local authority up to week ending 13th November 2020, ONS

There have been a total of **177 COVID-19 related resident deaths** in Southampton. Of those, **109 died in hospital** and **68 in the community (54 of which were in care homes)**. There were **0 COVID-19 related deaths** in the most recent week, which is **lower (-2)** when compared to the **previous week**.

The chart to the left shows the number of **COVID-19 related deaths by week and setting**. The number of **COVID-19 related deaths peaked in mid-April** and have declined since.

In Southampton, resident **deaths** are now at **lower levels** compared to previous years.

Latest data shows that there was **4 COVID-19 related deaths in University Hospital Southampton (UHS)** between the 17th November up to 23rd November. This data is different from that published by ONS as it doesn't necessarily include Southampton residents, only those who have died at UHS.

Please note: data correct at time of publication, but subject to revision in subsequent weeks due to reporting delays

## Potential COVID-19 Pathways

Data up to 23rd November
