

## COVID-19 confirmed cases\*

Data up to 29th July

Total cases \*\*  
**962**

Cases in last 7 days \*\*  
**11**

Change in last 7 days  
**-2**

Average cases per day (last 7 days)  
**1.6**

There have been **962 confirmed cases** of COVID-19 in Southampton (includes both pillar 1 and 2 cases). There were **11 confirmed cases** in the **last 7 days**, which is a **decrease of -2** compared to the **previous 7 days**.

Data is correct at time of publication, but is subject to change due to reporting delays. Therefore, any changes in the number of infections should be **interpreted alongside overall trends**, as there will be daily fluctuations. It is more important to consider any **sustained increases** that may occur.

The chart to the left shows the **daily number of confirmed cases** and the **7 day moving average** (to smooth out fluctuations) in Southampton. The number of **new cases peaked** in Southampton in **April** and has **experienced a sustained decline** since.

\* Cases include both pillar 1 and 2

\*\* Correct at time of publication, but may be revised in future weeks due to reporting delays

## COVID-19 confirmed cases per 100,000 population\*

Data up to 26th July

Total cases per 100k population \*\*  
**379.0**

Cases per 100k population in current week \*\* (week 30)  
**5.54**

Cases per 100k population in previous week \*\* (week 29)  
**2.37**

Direction of travel to previous week  
**Increase**

Southampton has a total of **379.0** cases per **100,000 population**.

Public Health England publish weekly the number of cases per 100,000 population in their COVID-19 Surveillance reports. The trend in the weekly number of cases per 100,000 population is shown in the chart to the left. In the most recent week (**week 30**) there were **5.54 cases per 100,000 population**, which is an **increase** compared to the **previous week (2.37 cases per 100,000 population in week 29)**. Overall, the number of **infections remain low**.

**Numbers of cases vary by week and day** (see case numbers above). **Case numbers are also subject to revisions**, especially most recent data. It should be noted that low case numbers can impact on the **reliability of estimates**.

\* Cases include both pillar 1 and 2

\*\* Correct at time of publication, but subject to revision in subsequent weeks due to reporting delays

## COVID-19 related deaths

Deaths occurring up to 17th July

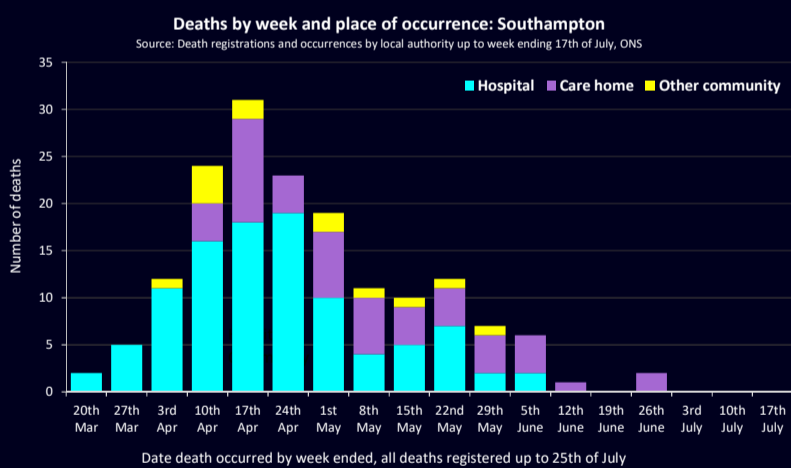

Total deaths  
**165**

Of which  
**101**

Community  
**64**  
(51 of which in care homes)

In the last week  
**0**  
Deaths

Change from previous week  
**0**

There have been a total of **165 COVID-19 related resident deaths** in Southampton. Of those, **101 died in hospital** and **64 in the community** (**51 of which were in care homes**). There were **no COVID-19 related deaths** in the most recent week, which is **no change** compared to the **previous week**.

The **chart to the left** shows the number of **COVID-19 related deaths by week and setting**. The number of **COVID-19 related deaths peaked in mid-April** and have declined since.

In Southampton, resident **deaths** have now come down to **expected levels** compared to previous years.

Latest data shows that there was **1 COVID-19 related death in University Hospital Southampton (UHS)** in the last week (23-29 July). This data is different from that published by ONS as it doesn't necessarily include Southampton residents, only those who have died at UHS.

## Potential COVID-19 Pathways

Data up to 30th July

999 calls

Total in last 7 days

Change in last 7 days

**8**

**+2**

111 calls

**37**

**+5**

111 online

**86**

**+2**

In the last week there have been **8 calls to 999** where people are reporting potential COVID-19 symptoms, **37 calls to 111** and **86 people reporting symptoms through 111 online**. There has been an **increase in the number of 999 calls** relating to COVID-19 symptoms in the **last 7 days (+2)**, as well as an increase in **111 calls (+5)** and **111 online triages (+2)** in the last 7 days.

Although there has been a slight increase in 999 calls, 111 calls and 111 online triages in the last week, the **overall trend** illustrated by the chart above is one of **decline**, across all pathways and the numbers in the last week **remain relatively low**.
