

West Central Neighbourhood

Data & Intelligence

West Central

To enable integrated neighbourhood health and care delivery, Southampton has been split into six neighbourhoods. They are (mostly) made up of 3 existing electoral wards and range from around 30k to 50k residents.

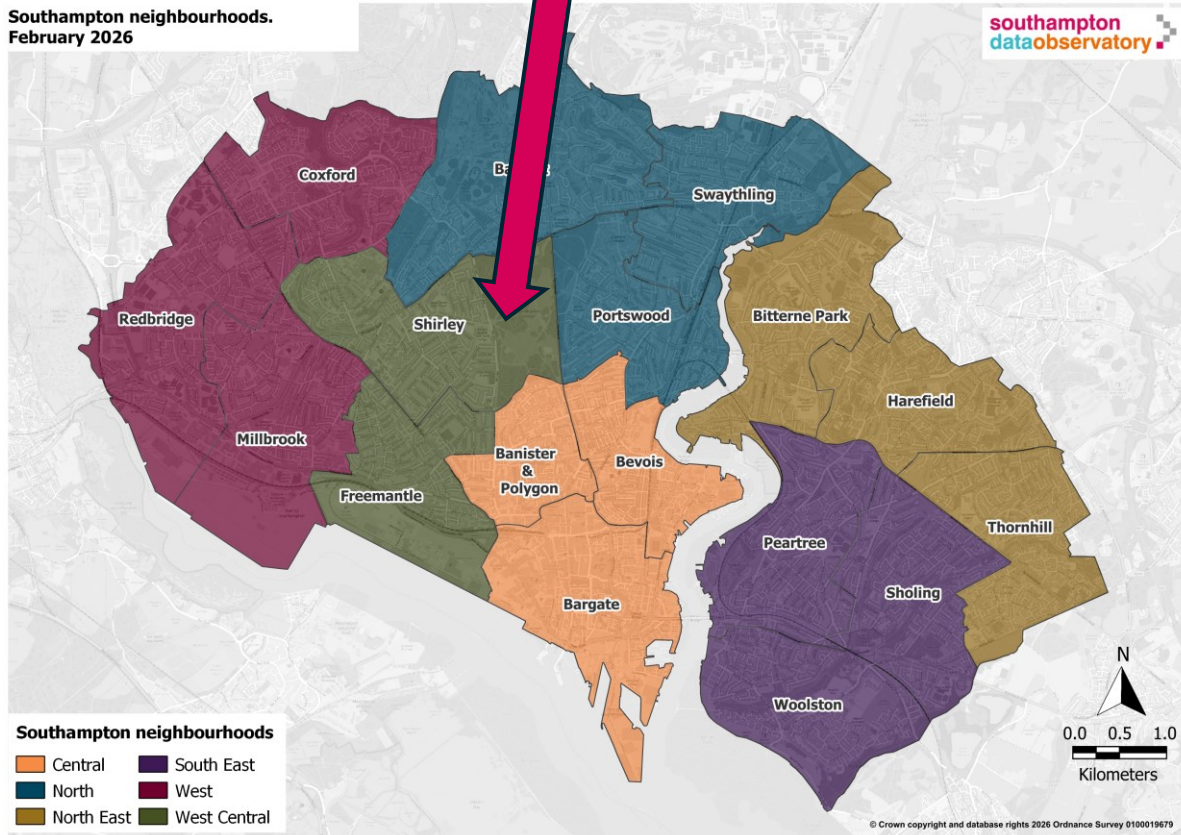

Each neighbourhood has been profiled based on its unique composition and need*. These needs will be used to prioritise and inform service delivery at a local level in Southampton.

**Broad generalisations have been made about what makes each neighbourhood different. There are many individual residents in each neighbourhood who do not fit the profile.*

Green space and active travel

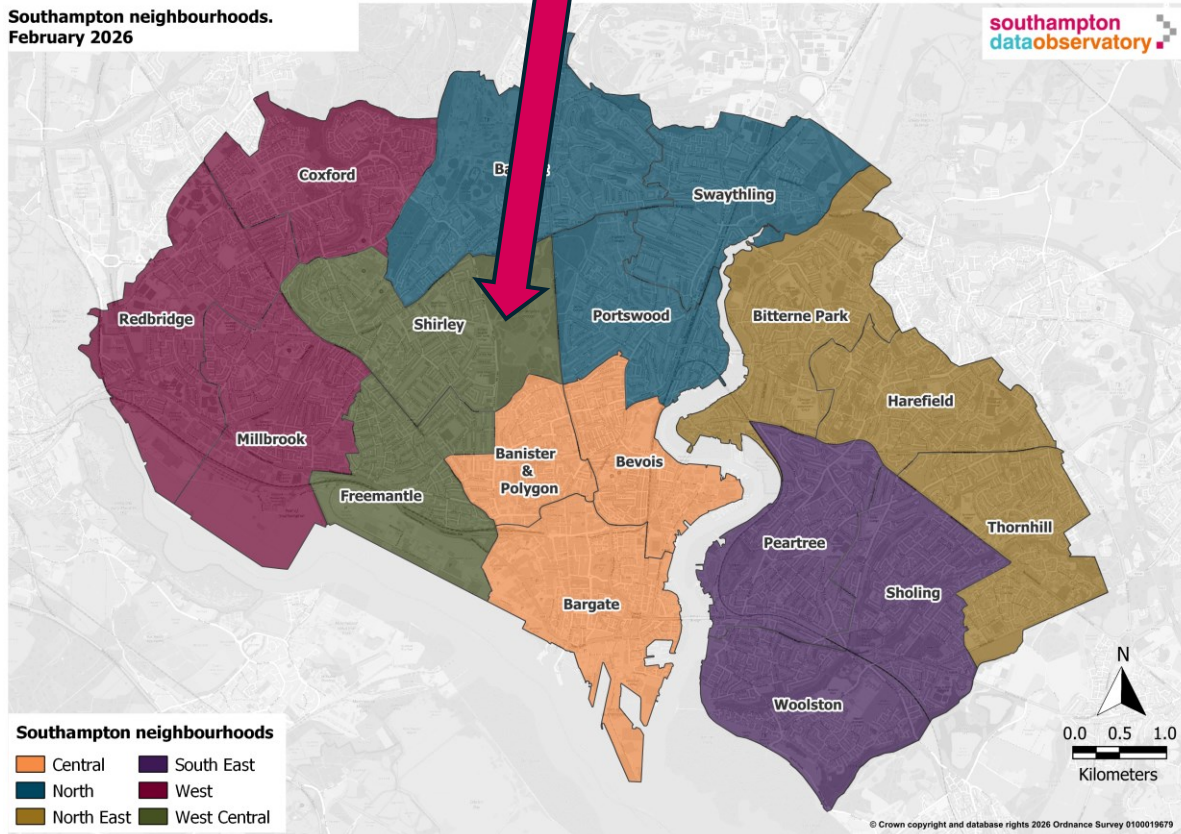

Health & care summary

Mostly good outcomes, ASC need in Shirley, high drug admissions in Freemantle

West Central Neighbourhood

Pop: 29,404

Southampton neighbourhoods.
February 2026

Southampton's smallest neighbourhood by population, West Central is the only one made up of just two wards. There are 16 LSOAs here, 11 are more deprived than the England average however only one is in IMD1 (England's most deprived 20% LSOAs). This is E01017250 next to Shirley High Street.

Almost sharing a border, E01017248 (on the western side of Southampton Common) is one of the least deprived areas in England, showing the close geography of inequality in the city.

Average life expectancy and most measures of health are around the city average or better in this neighbourhood. However, Shirley has some acute ASC needs and Freemantle has some of the highest drug related admission rates in the city.

Education attainment and attendance is significantly better here than the rest of Southampton. Nearly a third of Shirley is taken up by Southampton Common. It has the best active travel rates and the highest percent of greenspace of all wards in Southampton.

The population is growing slowly, forecast to increase by around 400 (1.4%) by 2030.

Discussion points

Adult Social Care	Freemantle	Shirley	Southampton average
Rate of contacts with Information, Advice and Guidance outcome	31.7 per 1k	34.7 per 1k	27.9 per 1k
Ward ranking (1= highest)	6th	4th	
Rate of safeguarding concerns	3.3 per 1k	6.7 per 1k	4.9 per 1k
Ward ranking (1= highest)	15th	3rd	

Shirley has some of the highest ASC needs in the city, Freemantle is also in the top 6 for total ASC contacts.

Despite the positive overall health statistics, Freemantle is one of the worst wards in the city for drug related hospital admissions. By contrast the other half of West Central neighbourhood (Shirley) is one of the best for this measure.

Admissions	Freemantle	Shirley	Southampton average
Drug use poisoning admissions (primary diagnosis) 5 yrs	64.8 per 100k	30.8 per 100k	40.9 per 100k
Ward ranking (1= highest)	2nd	15th	
Drug related mental/behavioural admissions (primary/secondary diagnosis) 3yrs	534.1 per 100k	126.4 per 100k	272.6 per 100k
Ward ranking (1= highest)	2nd	15th	
Drug related mental/behavioural admissions (primary/secondary diagnosis) 5 yrs	470.3 per 100k	155.1 per 100k	256.0 per 100k
Ward ranking (1= highest)	2nd	15th	

Crime	Freemantle	Shirley	Southampton average
Domestic Abuse crime rate	22.2 per 1k	18.9 per 1k	18.7 per 1k
Ward ranking (1= highest)	5th	8th	
Violent crime rate	55.9 per 1k	56.5 per 1k	48.2 per 1k
Ward ranking (1= highest)	7th	6th	

Freemantle and Shirley also have significant challenges with crime. Domestic abuse and violent crime are higher in this neighbourhood compared to the city average. Violent crime is significantly higher in both wards.

Discussion points

How do these insights impact priorities?

■ Significantly worse than city	■ Significantly higher than city
■ Similar to city	■ Similar to city
■ Significantly better than city	■ Significantly lower than city

Education attainment and absence is significantly better across the board in the West Central neighbourhood. Shirley has the best Key Stage 4 attainment in the city and Freemantle has the best suspension rate.

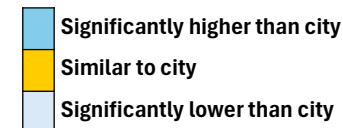

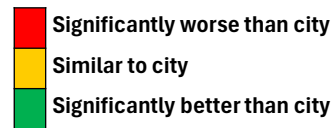

Education	Freemantle	Shirley	Southampton average
Overall absence	7.1%	7%	8.1%
Ward ranking (1= highest)	12th	13th	
Persistent absence	19.4%	18.6%	22.6%
Ward ranking (1= highest)	12th	14th	
Key Stage 4 (Attainment 8)	45.6%	49%	42.8
Ward ranking (1= lowest)	11th	17th	
Suspensions rate	2.7 per 100	6.3 per 100	10.3 per 100
Ward ranking (1= highest)	17th	12th	

Other Health	Freemantle	Shirley	Southampton average
Walk or cycle to work if employed	17.4%	23.8%	15.1%
Ward ranking (1= lowest)	12th	17th	
Percentage of Greenspace	1.1%	36.5%	7.1%
Ward ranking (1= highest)	17th	1st	

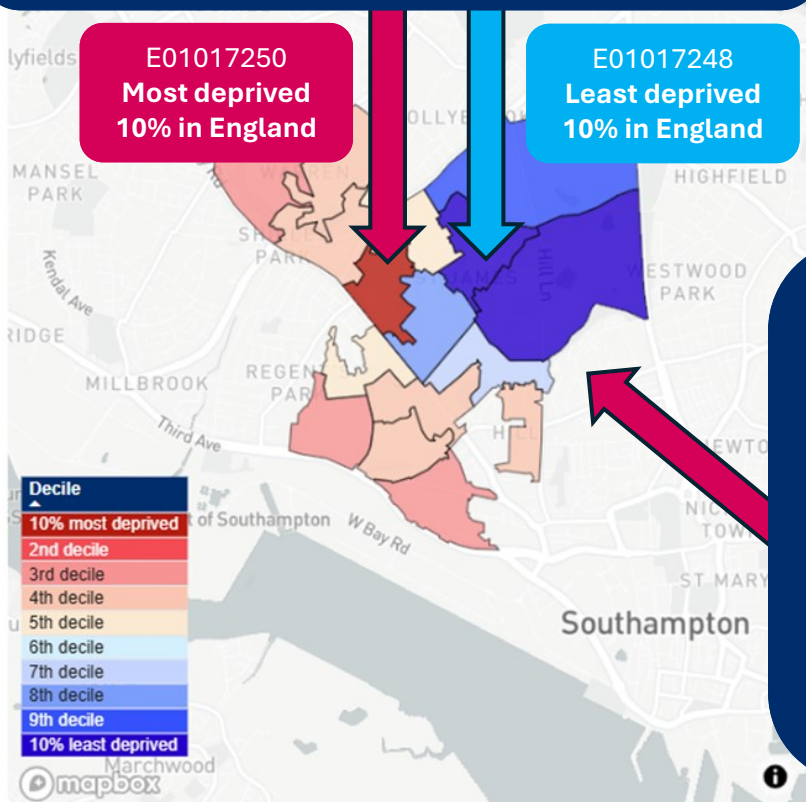

Shirley has the most greenspace in the city (with its proximity to Southampton Common) this is reflected in the number of people walking or cycling to work. In stark comparison the other half of this neighbourhood has the least greenspace in the city, despite this Freemantle has significantly better active travel rates than the city average.

Discussion points

How do these insights impact priorities?

LSOAs in England's most and least deprived deciles can be found in this neighbourhood, separated by a few hundred meters.

Economy	Freemantle	Shirley	Southampton average
Percentage of residents age 16+ with no qualifications	16.1%	15.7%	17.3%
Ward ranking (1= highest)	10th	12th	
Percentage of residents age 16+ with level 4+ qualifications	37.8%	40.4%	31.6%
Ward ranking (1= lowest)	12th	14th	
Percentage of unemployed residents (aged 16+ economically)	3.7%	2.5%	3.0%
Ward ranking (1= highest)	3rd	14th	

This neighbourhood has significantly better qualified residents aged 16+, Shirley has one of the lowest unemployment figures in the city while Freemantle has one of the worst.

IMD 2025:

West Central neighbourhood

- 16 LSOAs
- 1 LSOA in 20% most deprived
- 6.3% (1,723) of residents within West Central neighbourhood in 20% most deprived (significantly lower than Southampton average (24.3%))

West Central neighbourhood has the third highest rate of home ownership in the city, more than half of homes here are owned (51%). It has the lowest rate of social rented homes in Southampton (15%).

Good outcomes with some health pressures

- **Both Freemantle and Shirley have better overall mortality rates than the Southampton average, and female life expectancy is significantly higher in Freemantle, indicating stronger general health outcomes in the neighbourhood.**
- **Freemantle shows specific areas of elevated premature mortality, ranking 3rd highest in the city for under-75 mortality from both cardiovascular disease and cancer.**
- **Healthy-weight outcomes in children vary, with Shirley among the top three wards for healthy weight in Year 6, while Freemantle ranks 3rd highest for healthy weight in Year R.**

Different levels of vulnerability for hospital admissions

- **Freemantle has high levels of need, with the 2nd highest drug-misuse admission rate in the city, while Shirley ranks among the lowest, indicating very different substance-related pressures across the neighbourhood.**
- **Falls admissions in people aged 65+ are higher in Shirley, though both wards sit close to the Southampton average.**
- **Freemantle shows contrasting patterns in childhood and young-people injuries—it is the 4th lowest ward for admissions among 0–14s, yet the 3rd highest for 15–24s, significantly worse than the Southampton average; Shirley is similar to the city average for both groups.**
